

SUPERIOR INTEGRATED SOLUTIONS (SiS)

DELIVERING EXCELLENCE WITH BUSINESS

BRIDGING THE GAP BETWEEN OPERATIONAL TECHNOLOGY AND INFORMATION TECHNOLOGY.

Who We Are

- Superior Integrated Solutions [SiS] is a pioneering technology solutions provider specialising in **Industrial Automation**, IIoT, industrial data analytics, and custom software/hardware solutions.
- Our innovative approach to **Industry 4.0** and digital transformation is the key enabler to Real-time data-driven decision-making, predictive maintenance, and process optimisation.
- Team of **highly skilled engineers** with proven expertise in industrial automation, Data Science, and software development.
- Successfully implemented large-scale digital solutions and provided qualified engineers for various industries in the region.

The driving force behind our digital integration

1

Mission

To bridge Operational Technology (OT) and Information Technology (IT) through Realtime data-driven decision-making.

2

Vision

To establish a future standard of predictive maintenance and complete process optimization across the region's heaviest industries.

3

Core Values

Delivering excellence through a team of highly skilled engineers, blending deep industrial legacy with modern data science.

Core Operating Principles

Precision

Execution of highly complex industrial automation and data science with exactitude.

Innovation

Pioneering custom software and IIoT approaches to solve legacy challenges.

Reliability

Successfully implementing and sustaining large-scale solutions for critical regional industries.

Vendor-Agnostic Industrial Digital Architecture for OT-IT Integration

Key Ecosystem Partners

SIEMENS

Schneider Electric

EGYPT 4 INDUSTRY
AVEVA

PTC

odoo

The Architecture of Innovation

This framework defines a holistic approach to industrial innovation, bridging the gap between physical factory automation and high-level data intelligence. It categorises essential services into foundational infrastructure and advanced analytical ecosystems.

Industrial Automation

Pioneering technology solutions for the modern factory and large-scale infrastructure implementation.

SCADA and Dashboard

Delivering real-time monitoring and robust control of industrial processes via Supervisory Control and Data Acquisition.

IIoT and Data Analytics

Connecting physical assets to digital ecosystems to transform raw telemetry into actionable intelligence.

Custom Solutions & Outsourcing Services

Tailored engineering services and AI-powered technologies that drive efficiency, agility, and measurable results.

Bridging Information & Operational Technology

Engagement Methodology

The Industrial Digital Transformation Roadmap

A Trajectory of Growth: Revolutionizing Industrial Automation

SiS Regional Industrial Footprint

Strategic Overview

Oil & Gas

**Khalda Petroleum –
Marsa Matrouh, Egypt**

Deployment of Well Head
Wireless HART Transmitters
and seamless integration
with SCADA systems.

Saudi Aramco – KSA

Well Heads Safety System
Upgrades utilizing SIEMENS
S7-400H, PCS7, Schnelder
Electric Triconex, and
Foxboro technologies.

Expanding MENA Presence

SIS is establishing strategic regional hubs
to better serve the industrial needs of the
Middle East and North Africa.

Centralised Project Management

Ensuring consistent quality and oversight
across all regional operations through a
unified management approach.

Water and Waste Water

Béjaia RO Plant – Algeria

Full commissioning of PLC
and SCADA systems paired
with network cybersecurity
for a Reverse Osmosis
desalination facility.

**Saline Water Conversion
Corp (SWCC) – KSA**

Execution of comprehensive
hardware commissioning,
software logic validation,
and field integration for
desalination operations.

Chemical Industries

Gas Cool & Emisal – Egypt

Provision of advanced automation solutions
designed for process optimisation within
chemical manufacturing plants.

Food, Beverage and Recycling

BariQ – Cairo, Egypt

Delivery of specialised
automation and digital
solutions tailored for the
Food, Beverage, and
Recycling sectors.

**Henkel – 6th of October,
Egypt**

Implementation of Heat
Tracing, Boric Acid/Enzyme
control systems, and
Saponification Mixer
automation.

Heavy Industries

Al Takamol Cement – Sudan

Industrial automation and support services for
large-scale cement manufacturing operations.

Geographic Distribution of Major Project Hubs

Region	Highlighted Countries
North Africa	Algeria, Egypt
East Africa	Sudan
Arabian Peninsula	Saudi Arabia (KSA)

Sector Showcase: Food, Beverage & FMCG

Transforming legacy operations into highly connected, automated environments.

6th of Oct, Egypt

Project Scope

Comprehensive SCADA software upgrade, process automation for chemical mixing, full mechanical/electrical integration.

SCADA & Supervisory Upgrades

- ✓ Complete software upgrade of legacy SCADA stations to modern 'Schneider Electric CITECT' environments.
- ✓ Deployment of new operating stations specifically designed for new batch processes.
- ✓ Seamless integration of 'Schneider Electric Modicon M580' hardware with the CITECT SCADA interface, ensuring real-time patch process visibility.

Henkel: Advanced Process Automation & Deployment

Process Automation

Thermal Control

Heat Tracing systems & Heating Ovens. Fully integrated and automated using SIEMENS TIA & WINCC.

Chemical Dosing

Boric Acid and Enzyme Control systems. Automated mechanical equipment driven by SIEMENS TIA & WINCC logic.

Turnkey Project

Saponification Mixer. End-to-end electrical, automation, and mechanical supply, including full installation, commissioning, and startup.

Augmentic Reality

AR overlays digital guides and live data onto workers' view, cutting errors and training time while enabling remote support without stopping production.

Live System Validation

Real-time logic validation and SCADA commissioning on the Henkel factory floor.

Sustainable Resources: BariQ Integration

bariq  Cairo, Egypt
AN NIHO SUSTAINABLE RESOURCES COMPANY

Integration

Factory ERP ODOO modules fully integrated with ground-level production line controllers.

Connectivity

SCADA Database Connectivity achieved using bespoke SiS bridging solutions.

Visibility

Smart SCADA & Reporting system deployment allowing granular, real-time monitoring.

Sector Showcase: Water & Waste Water

 Béjaïa RO Water Desalination Plant (Algeria)

PLC Commissioning via Modicon M580 PLCs.

Execution driven by Control Expert V16 and Vijeo Designer V6.3.

SCADA IO Server Redundancy ensuring zero operational downtime.

Comprehensive Documentation & PLC-SCADA Communication Verification.

Network Cybersecurity hardening for remote infrastructure.

Regional Water Infrastructure Execution

Qaliobia, Egypt (Waste Water)

Al Arish, Egypt (UNIHA Water Technology)

Sector Showcase: Chemical Industries

Safety Relief Valve

ON/OFF Isolation Valve

Control Valve

Fayoum, Egypt.

Providing centralised SCADA system for a fire alarm panel using a wi-fi network, integrating wincc SCADA with a SIEMENS PLC, enables real-time monitoring, remote alarm visualisation, and centralised control of fire detection devices across multiple buildings or zones

Comprehensive Supply and control configuration of critical high-pressure steam and chemical valves

Ground-level mechanical reliability is the prerequisite for top-level digital analytics.

Sector Showcase: Oil & Gas

Khalda Petroleum Company

Marsa Matrouh, Egypt

**Wireless network deployment
includes configuring pressure and temperature
transmitters for the DOF project (Digitalise Oil Field)**

**I. Site Survey &
Network Planning**

**II. Transmitter
Installation**

**III. Wireless
Network
Configuration**

**IV. Gateway
Installation**

**V. Commissioning
& Startup**

Enhancing Operational Efficiency: TAK Foods Factory

 Menofia, Egypt

BACKEND UPGRADES

1. Standardised Platform:

Replaced proprietary custom system with industry-standard Siemens PLC.

II. Real-time process visualisation: Enhanced Motor Control.

III. Upgraded to modern variable frequency drives.

IV. Precise speed control.

FRONTEND MODERNISATION

2. Modern HMI Interface:

I. New Siemens touchscreen for intuitive operation.

3. Complete Electrical Renewal

- ✓ I. Brand new control panel with modern components
- ✓ II. Clean wiring and proper labelling
- ✓ III. Improved safety and reliability

Sector Showcase: Heavy Industries

Greater Cairo Foundries Co.
شركة مساهمة القاهرة الكبرى

Sharqia, Egypt

Greater Cairo Foundries Co. (GCF)

1. Providing new SIEMENS automation system.
2. Upgrading SCADA station with SIEMENS WinCC software
3. Supplying power and control panels, assembly, installation and startup

The SiS Capability Matrix

Client	SCADA Upgrades	ERP Integration	Hardware Commissioning	Safety & Shutdown Systems	Network Cybersecurity
Henkel	✓		✓		
BariQ	✓	✓	✓	✓	
Gas Cool	✓		✓		✓
Emisal	✓	✓	✓	✓	
Saline Water	✓		✓	✓	✓
Saudi Aramco	✓		✓	✓	✓
Béjaïa RO	✓		✓	✓	✓

A proven track record spanning software integration, **physical hardware commissioning**, and **mission-critical** cybersecurity.

Let's Digitalise Your Universe.
